EDUCATION

Drexel University Philadelphia, PA
B.S. Computer Engineering, Minor in Data Science Graduated: June 2025

Relevant Coursework: Exploratory Data Analytics | Data Science Programming | Database Management Systems | Business Statistics I & II | Probability for Engineers | Adv Programming for Engineers

SKILLS

Languages: Python, SQL, R, JavaScript, Node.js, C/C++, HTML/CSS
Data & Analytics: Snowflake, PostgreSQL, Databricks, Power BI, MicroStrategy, Tableau, Excel
Cloud & Tools: AWS, Azure, GitHub, Postman, Jira, Confluence, Figma, Agile/Scrum
AI / ML: Scikit-learn, TensorFlow, PyTorch, XGBoost, Reinforcement Learning, LLM APIs (OpenAI, Gemini, Claude)

WORK EXPERIENCE

Data Analytics Engineer | *Wawa Inc.* April 2024 – September 2024

- Built scalable SQL-based ELT pipelines in Snowflake to automate data reconciliation and validation across 3M+ pricing records (SAP, POS, eCommerce), ensuring data integrity across all dataflows during legacy system migration.
- Developed MicroStrategy KPI dashboards monitoring sales and customer behavior across 900+ stores, delivering hourly insights and benchmark comparisons to support pricing and promotional decisions.
- Conducted market analysis using multivariate regression and hypothesis testing in R to model regional price elasticity, providing foundational insights for Wawa’s Localized Geographic Price Zones strategy.

Product Analyst | *iPipeline* April 2023 – September 2023

- Developed and validated a KNN-based ML classifier to extract data fields from insurance forms at 90% accuracy, reducing manual processing time and improving onboarding efficiency for iPipeline’s iGo users
- Designed interactive Power BI dashboards using DAX and Power Query to track software delivery KPIs across 15+ SaaS products, enabling early risk identification and supporting a 30% improvement in project delivery
- Automated ingestion and transformation of Jira SDLC data via REST APIs into a centralized dataset, enabling traceability across defects, releases, and QA to power a weighted Quality Index for insurance SaaS products

Business Systems Architect | *Cencora (Fortune 10)* April 2022 – August 2022

- Led requirements analysis for an Azure-based Warehouse Management System, collaborating with business stakeholders to translate business objectives into technical specifications, user workflows, and system documentation
- Managed the product backlog in an Agile environment, authoring and prioritizing 100+ user stories with acceptance criteria for core features including authentication, role-based access, inventory operations, and order workflows
- Validated RESTful APIs in Postman and executed test cases in Azure DevOps to ensure system reliability, error handling, and data synchronization - documenting findings to support QA handoff.

PROJECTS

AI-Driven RIS Network Optimization Sept 2024 – April 2026

- Led AI development for an NSF-funded Reconfigurable Intelligent Surface (RIS) project, building Reinforcement Learning models achieving 95% accuracy in optimizing 6G signal performance across 1,000+ locations
- Built scalable Python ETL pipelines processing 2M+ wireless simulation data points into structured, ML-ready datasets with domain-specific feature engineering and automated validation layers

Focura, Best AI Implementation Winner at DragonHacks 2025 May 2025

- Built an AI-powered app detecting slouching and phone distraction in real-time, delivering intelligent nudges to keep users focused - implemented using MediaPipe, LangGraph, and Gemini API with modular pipeline architecture, scoped and validated end-to-end within a 24-hour hackathon deadline

LEADERSHIP & INVOLVEMENT

Study Abroad Ambassador | *Drexel Global* Sept 2024 – June 2025

- Led 40+ info sessions advising students on global engagement programs and study abroad scholarship opportunities

Hackathon Coordinator | *IEEE, Drexel University* Sept 2021 – April 2024

- Led end-to-end planning and execution of Drexel’s annual hackathon for 300+ participants, overseeing teams across marketing, logistics, and sponsorships while coordinating timelines, budgets, and stakeholder communication

Teaching Assistant | *Drexel University* Sept 2021 – Dec 2021

- Facilitated weekly labs and mentored 60 students in hands-on engineering design and data analysis projects

HONORS & AWARDS

Charles Lindermann Scholarship (2024) | A.J. Drexel Scholarship (2020–2025) | DU Engineering Scholarship (2022)
